SYMBOLS SHEET

The following symbols shall be used in this Tariff for the purpose indicated below:

C - To signify changed rate, term or condition

D - To signify discontinued rate, term or condition

I - To signify increased rate

M - To signify text moved from another tariff location, but no change in rate, term or condition

N - To signify new rate, term or condition

R - To signify reduced rate

T - To signify changed text or regulation, but no change in rate, term or condition
TARIFF FORMAT

A. **Sheet Numbering** - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the Tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.

B. **Sheet Revision Numbers** - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the NPSC. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Because of various suspension periods, deferrals, etc., that the NPSC follows in its tariff approval process, the most current sheet number on file with the Commission is not always the tariff page in effect. Consult the Check Sheet for the sheet currently in effect.

C. **Paragraph Numbering Sequence** - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:

2.
2.1.
2.1.1.
2.1.1.A.
2.1.1.A.1.
2.1.1.A.1.(a).
2.1.1.A.1.(a).I.

D. **Check Sheets** - When a tariff filing is made with the NPSC, an updated check sheet accompanies the tariff filing. The check sheet lists the sheets contained in the Tariff, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by the symbols given on the symbols sheet. There will be no other symbols used on this page if these are the only changes made to it (i.e., the format remains the same, just revised revision levels on some pages). The Tariff user should refer to the latest check sheet to find out if a particular sheet is the most current on file with the NPSC.

Local Interconnection Service utilizes soft switch technologies.

B. Local Interconnection Service is offered only to facilities-based providers of interconnected VoIP services and provides access to, but does not include, domestic and international toll service, operator services, telephone number resources, 911 capabilities, and other services as defined by the Company and the Customer. These additional services are available on an Individual Case Basis upon the Customer’s request.

C. Facilities and equipment of a type and/or quantity necessary to provide Local Interconnection Service may not be available on a ubiquitous basis in the Company’s service area(s). Local Interconnection Service is available to Customers only where the Company (a) has suitable facilities and can operate in a technically and economically feasible manner, and (b) has been authorized to provide Service.
D. In order to make use of Local Interconnection Service, the Customer’s facilities must consist of an IP-based, broadband network that uses a Cable Modem Termination System (“CMTS”). Local Interconnection Service does not support Customers providing services to End Users that operate using a different format.

E. Local Interconnection Service does not support “nomadic” VoIP services. The Customer must provide its services to each End User at a fixed service address.

3.3.1 Availability of Local Interconnection Service on an Individual Case Basis

A. Upon receipt of a bona fide request for Local Interconnection Service from a Customer, the Company will negotiate in good faith with the Customer to enter into an agreement that effectuates the terms and conditions set forth in this tariff.

B. Recurring and nonrecurring costs for components of Local Interconnection Service other than those identified in Section 4 will be developed on an Individual Case Basis in response to a bona fide request from a Customer or prospective Customer to develop a competitive bid for service. Charges will be offered to the Customer in writing and on a nondiscriminatory basis.

3.3.2 Customer Use of Local Interconnection Service

A. The Customer shall, at its sole cost, be responsible for providing all equipment, software, facilities and IP connectivity necessary for the Customer to provide interconnected VoIP service to its End Users. The IP-based, broadband connecting facility between Customer and End Users, the CMTS, the soft switch, the connecting facilities to the Company’s media gateway, and all customer premises equipment must be provided by the Customer or its End Users and is not included as part of Local Interconnection Service.

B. The Customer must provide the proper signaling information for all calls. To the extent that failure to provide ANI or other signaling information leads to increased charges from third parties to the Company, the Company may recover all such increased charges, as well as the Company’s reasonable costs associated with defending against and/or administering such increased charges, from the Customer. If for two months in any 12 month period the Customer sends calls to the Company lacking required signaling information in excess of five percent of all calls during such months, the Company may terminate Local Interconnection Service to the Customer immediately with no liability from the Company to the Customer for such termination.

The Customer shall deliver to the Company valid postal addresses that can be confirmed against the Master Street Address Guide (“MSAG”).

D. The Customer shall not: (a) re-classify or re-originate traffic or take any other action to make traffic appear as if it: (i) is anything other than the type of traffic delivered to such party (including but not limited to making TDM-originated traffic appear to be IP-originated) or (ii) originated from a place or on a type of equipment different from the place or type of equipment from where it, in fact, originated; or (b) modify, alter or delete in any manner calling party number information, originating point codes or any other signaling information, or call detail in connection with the transport and termination of traffic to the called party.

E. Local Interconnection Service is limited to End Users physically located in areas served by the Company. The Customer shall in all cases assign telephone numbers to End Users based on the End Users’ locations and fully in accordance with NANPA guidelines associating NPA-NXX codes with particular exchange areas. Unless otherwise agreed by the Company and the Customer on and Individual Case Basis, Local Interconnection Service is not to be used with any “virtual numbering” or foreign-exchange-like arrangements.

F. The Company and the Customer will conduct interoperability testing prior to the Customer’s implementing any software or call flow upgrade, enhancement or modification thereto. All special configurations are subject to the Company’s approval. The Company may terminate (without liability) Local Interconnection Service where proper interoperability testing has not been completed.

Such costs are not included in the rates specified in Section 4 of this tariff.

C. The Customer may act as the Company’s agent in obtaining End User requests to port a telephone number from a third-party telecommunications provider to the Company so that the Customer may provide interconnected VoIP service to the End User using that ported number (“Port-In”). The Customer represents and warrants that it has all necessary rights and authority necessary for any Port-In request, will provide copies of letters of authority authorizing the same (or access to recordings of third-party verification of customer ports) upon request and shall indemnify, defend and hold harmless the Company and its affiliates from any third party claim related to or arising out of any Port-In (or request for Port-In). The Customer shall not request a Port-In in any situation that does not meet the definition of “number portability” contained at 47 C.F.R. § 52.21(m).

D. The Company shall honor requests received from third-party providers of telephone exchange service to port to such a provider a telephone number currently assigned to an End User (“Port-Out”).
