C – To Signify a Change in Rate Schedule or Term or Condition
D – To Signify a Discontinued Rate or Term or Condition
I – To Signify an Increased Rate
M – To Signify Text Moved from Another Tariff Location; But No Change in Rate or Term or Condition

Check Sheets – When a tariff filing is made with the Commission, an update check sheet accompanies the tariff filing.

Sheet Numbering and Revision Levels – Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between existing sheets 14 and 15 would be 14.1. Revision levels also appear in the upper right corner of each page. These levels are used to determine the most current sheet version on file with the Commission. For example, the 4th Revised Sheet 14 cancels the 3rd revised Sheet 14.
TARIFF FORMAT

A. **Sheet Numbering** – Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.

B. **Sheet Revision Numbers** – Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the Commission. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Because of various suspension periods, deferrals, etc. that the Commission follows in their tariff approval process, the most current sheet number on file with the Commission is not always the tariff page in effect. Consult the Check Sheet for the sheet currently in effect.

C. **Paragraph Numbering Sequence** – There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:

1. 2.
   2.1.
   2.1.1.
   2.1.1.A.
   2.1.1.A.1.
   2.1.1.A.1.(a).
   2.1.1.A.1.(a).I.
   2.1.1.A.1.(a).I.(i).(1).

D. **Check Sheets** – When a tariff filing is made with the Commission, an updated check sheet accompanies the tariff filing. The check sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by the symbols given on the symbols sheet. There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some pages). The tariff user should refer to the latest check sheet to find out if a particular sheet is the most current on file with the Commission.

SECTION 4 – RATES

4.1.3 Expedite Service

A. General

Upon acceptance of the Customer's application for service, the Company will notify the Customer of the time frame in which service will be installed. When a Customer requests to have an order processed faster than the established service interval and the Company agrees to give priority handling within its operations, an Expedite Service charge will apply.

B. Limitation of Liability

Once requested and accepted, the Expedite Service charge applies irrespective of whether the expedite request results in a shorter service interval. The Customer indemnifies and saves the Company harmless against any and all claims for damages caused or claimed to have been caused directly or indirectly when an established expedited due date is not met by the Company.

C. Description of Charges

The Expedite Service charge is applicable per location, per request and applies in addition to any other service and installation charges. The Company reserves the right to assess any documented charges imposed by a third party that are directly associated with the Customer's request to expedite the service order.
