2. Rules and Regulations**2.2 Practices and Procedures (Cont'd)****2.2.13 911/E-911 Emergency Services**

- A. The Telephone Company will supply the 911/E-911 service provider in the Telephone Company's service area with information necessary to update the 911/E-911 database at the time Telephone Company accepts Customer orders.
- B. Database records provide customer-specific information that includes the Customer name and service address. This information is made available to emergency service providers in the event that a call is placed to 911 from the End User's telephone.
- C. To ensure 911 calls and emergency personnel are properly routed, Telephone Company equipment must not be moved by the Customer or User. Additionally, the Telephone Company recognizes one address for all lines on the same Account and will not be responsible for multiple address location information. Therefore, the Customer and its Users are responsible for directing emergency personnel to the specific location or person requiring emergency assistance and to any other physical location if all telephones are not located at the address on the Account.
- D. Where a 911 call is placed by the calling party via interconnection with an interexchange carrier or operator service provider, the Company cannot guarantee the completion of said call or the quality of said call.
- E. The Telephone Company provides Automatic Location information (ALI) to the Public Safety Answering Point (PSAP). For services ordered by the customer the Telephone Company will provide this location information for all lines on the same account. The Telephone Company does not support multiple address locations. The only address sent to 911 operator for all telephone numbers is the service address listed on the account. The Customer is responsible for directing any emergency personnel, related to a 911 call, to the correct building, room, location or person in need of emergency assistance.
- F. If Customer requires location-specific Automatic Location Information (such as floor and room number within a building) for delivery to the Public Safety Answering Point, or otherwise desires E-911 service to be provided for multiple user configurations, Customer must implement private switch/Automatic Locations Identification (PS/ALI). Customer must obtain the software and support that enables PS/ALI from a third-party provider.
- G. The Telephone Company will bill the Customer a monthly surcharge, per voice grade equivalent line in order to fund the E-911 system.

2.2.14 Access to Telecommunications Relay Service

Telecommunications Relay Service (TRS) enables deaf, hard-of-hearing or speech-impaired persons who use a Text Telephone (TT) or similar devices to communicate with the hearing population not using TT. It also allows the hearing population not using a TT to communicate with deaf, hard-of-hearing or speech-impaired persons who do use a TT. A Customer will be able to access the state provider to complete such calls by either dialing the applicable telephone number directly or by dialing the number 711, where available.

In such event of an error or omission in the name listing such Customer's correct name and telephone number shall be filed with directory assistance operators. The correct number will be furnished the calling party either upon request or interception.
- C. Whenever any Customer's telephone number is changed after a directory is published, the utility shall intercept all calls to the former number for a reasonable period of time and give the calling party the new number provided existing telephone equipment will permit and the Customer so desires.
- D. Call completion of a requested directory assistance listed number may be provided to a customer as part of this service. 5.1 Service Offering

5.1.1 Regulations

- A. Subject to the terms set forth following, the purpose of this Tariff is to provide an overview of Local Interconnection Service (“LIS”) and the terms and conditions under which LIS is offered.
- B. Facilities and equipment of a type and/or quantity necessary to provide LIS are not available on a ubiquitous basis in the Company’s service area(s). To limit the real potential for stranded investment, recurring and nonrecurring costs will be developed on a case-by-case basis in response to a bona fide request from a Customer or prospective Customer to develop a competitive bid for Service. Charges will be offered to the Customer in writing and on a nondiscriminatory basis.
- C. Upon receipt of a bona fide request for LIS from a Customer, Company will negotiate in good faith with the Customer to enter into an agreement that effectuates the terms and conditions set forth in this Tariff.
- D. LIS is available to Customers for resale to retail Subscribers.
- E. The Customer must comply with all applicable FCC regulations governing the provision of interconnected Voice over Internet Protocol (“VoIP”) service. In addition, it is the Customer’s sole responsibility to comply with all applicable laws and regulatory requirements.
- F. LIS does not support “nomadic” VoIP services. As provided elsewhere in this Tariff, the Customer must provide its services to Subscribers at a fixed service address.
- G. The terms and conditions set forth in this LIS Tariff are in addition to the terms and conditions found in Section proceeding, of this Tariff.

5.1.2 Definitions

For purposes of this Section, the following defined terms shall have the meaning indicated:

- A. “Customer” means the provider of retail interconnected VoIP services, as defined in 47 C.F.R. § 9.3, that purchases LIS from the Company in order to serve its own customers, which are the Subscribers to the interconnected VoIP service provided by the Customer.
- B. “Subscriber” means the interconnected VoIP end-user customer of the Customer.

5.1 Service Offering (Cont'd)

5.1.3 Description of Service

- A. LIS provides a connection between a Customer's broadband facilities and the public switched telephone network, and related Services described herein. In order to make use of the Company's LIS, Customer's broadband facilities must consist of an IP-based, broadband connecting Facility between the Customer and the Premises of each Subscriber that has the ability to use a Cable Modem Termination System (CMTS) employing the network-based call signaling specified by Cable Television Laboratories, Inc.(CableLabs®), a soft switch, a media gateway, and appropriate Customer Premises Equipment. LIS does not support Customers providing services to Subscribers that operate using a different format than provided by the Company.
- B. The IP-based, broadband connecting Facility between Customer and Subscribers, the CMTS, the soft Switch, the connecting Facilities to the Company's media gateway, and all Customer Premises Equipment must be provided by the Customer or its Subscribers and is not included as part of LIS. The Company will only accept and deliver traffic in time division multiplex ("TDM") protocol. The Customer shall, at its sole cost, be responsible for providing all equipment, software, facilities and IP connectivity necessary for the Customer to provide interconnected VoIP services to its Subscribers.
- C. LIS is available to Customers where suitable Facilities exist, are technologically available, and are operationally and economically feasible.
- D. LIS provides standard 10-digit telephone numbers with associated two-way local exchange telecommunications service to permit Customers to provide local interconnected VoIP service to Customer's Subscribers. Where available in a service territory, LIS may also include support for the provision of 911 capability, Telecommunications Relay Services (711), and Directory Listings. Toll services, operator services and directory assistance are not included in LIS. LIS does not support calling to 976 or similar exchanges or to calls to the 900 Service access code.

5.1.4 Use of Service

- A. LIS is provided subject to, and in accordance with, the regulations and rates in this Tariff, applicable law, and the Company's agreements with other providers, including but not limited to: applicable state or federal law, applicable state or federal regulations, orders issued by regulatory agencies and/or courts of competent jurisdiction, Incumbent Local Exchange Company ("ILEC") interconnection agreements, or similar requirements (collectively "Company Obligations"). To the extent that changes in Company Obligations affect the terms and conditions under which the Company may provide LIS, including being unable to provide LIS at all, the liability of the Company for any such changes shall be subject to the limitation of liability provisions set forth in Section 2 and this LIS Tariff.
 - 1. Customer shall, at its sole cost, be responsible for providing all equipment, software, Facilities and IP connectivity (including connectivity to Subscribers) necessary for the Customer to provide interconnected VoIP service to its Subscribers.

5.1.4 Use of Service (Cont'd)

A. (Cont'd)

1. (Cont'd)

- a. The Customer must provide the proper signaling information (e.g., originating Calling Party Number (CPN) (a/k/a Automatic Number Identification (ANI)), destination called party number, Originating Line Information Parameter ("OLIP") on calls to 8XX telephone numbers, calling party category, charge number, Automatic Location Identification (ALI), etc.) for all calls. To the extent that failure to provide ANI or other signaling information leads to increased charges from third parties to the Company as a result of the Company Obligations, the Company may recover all such increased charges, as well as the Company's reasonable costs associated with defending against and/or administering such increased charges, from the Customer. If for two months in any twelve month period the Customer sends calls to the Company lacking required signaling information in excess of 5% of all calls during such months, the Company may terminate LIS to the Customer immediately with no liability from the Company to the Customer for such termination.
- b. The Customer shall input, validate and maintain accurate Subscriber information so that the Company can provide such Customer-provided information to applicable national databases, including but not limited to, Automatic Local Identification (ALI) Database, Directory Listing information, Line Information Database (LIDB) and Caller ID with NAME Database (CNAM). The Customer shall deliver to the Company valid postal addresses that can be confirmed against the Master Street Address Guide ("MSAG").
- c. The Customer shall not: (1) re-classify or re-originate traffic or take any other action to make traffic appear as if it: (i) is anything other than the type of traffic delivered to such party (including but not limited to making TDM originated traffic appear to be IP originated) or (ii) originated from a place or on a type of equipment different from the place or type of equipment from where it, in fact, originated; or (2) modify, alter or delete in any manner calling party number information, originating point codes or any other signaling information, or call detail in connection with the transport and termination of traffic to the called party.
- d. Based on the Company Obligations, LIS is limited to Subscribers physically located in areas served by the Company. The Customer shall in all cases assign telephone numbers to Subscribers based on the Subscribers' locations and fully in accordance with North American Number Planning Association (NANPA) guidelines associating NPA-NXX codes with particular Exchange Areas. LIS under this Tariff is not to be used with any "virtual numbering" or foreign-exchange-like arrangements. Notwithstanding, the Company and the Customer may negotiate and enter into such arrangements on an individual case basis to serve legitimate subscriber requirements.
- e. The Company and the Customer will conduct interoperability testing prior to the Customer implementing any software or call flow upgrade, enhancement or modification thereto. All special configurations are subject to the Company's approval. The Company may terminate (without liability) LIS where proper interoperability testing has not been completed.
