3. Rules and Regulations

3.1 Obligation and Liability of the Telephone Company

3.1.1 Availability of Facilities and Equipment

The Telephone Company's obligation to furnish Services is dependent upon its ability to secure and retain, without unreasonable expense, suitable facilities and rights for the construction and maintenance of the necessary facilities, pole lines, circuits and equipment. Products, services, features and functions will be available in accordance with this tariff, where technically and operationally feasible.

The installation and restoration of Services shall be subject to the regulations set forth in this Tariff.

3.1.2 Interruptions of Service

In the event of an interruption to the service not due to the negligence or willful act of the customer or customer premises equipment, an allowance will be made if the interruption continues for more than twenty-four (24) hours from the time it is reported to or detected by the Telephone Company, upon customer request.

The customer is responsible for providing a suitable supply of commercial electrical power, including outlets, when and where required by the Company for the operation of any Company telecommunications equipment on the customer's premises. Failure to supply adequate commercial electrical power is considered negligence of the customer. A customer may be billed a service dispatch charge whenever a dispatch is made to correct a service interruption caused by the customer failure to pay for commercial electrical service.

In the event the Customer is affected by such interruption, not due to customer negligence, for a period of less than twenty-four (24) hours, no adjustment will be made. No adjustments will be earned by accumulating non-continuous periods of interruption.

3.1.3 Liability

In view of the possibility of errors and difficulties occurring in the transmission of messages by telephone, and the impossibility of fixing the cause thereof, the customer assumes all risks connected with the service except as follows:

If the initial installation is defective or if service is interrupted for more than twenty-four (24) hours otherwise than by the negligence or willful act of the customer or due to customer premises equipment, an allowance limited to the prorated portion of the monthly rate or guarantee for the service or portion thereof interrupted, shall be made after notice and demand to the Telephone Company. No allowance shall be made for interruptions due to the inside wiring or customer provided equipment.

(D)

3.1.3 Liability (Cont'd)

The Customer indemnifies and saves the Telephone Company harmless against any accident, injury or death caused through the use of apparatus which fail to meet the dielectric requirements as established by the Telephone Company when such apparatus is provided by the Customer. The Telephone Company has the right of refusing to, or ceasing to, render service to a Customer if at any time any of the telephones, appliances, lines or apparatus on the Customer's premises shall be considered unsafe by Telephone Company personnel, or if the use of the service shall be prohibited by or forbidden under any law, ordinance or regulation.

Upon the request of the Customer for trouble visit a charge will be made if trouble is found to be in customer-provided systems. The Telephone Company shall not be responsible for the installation, operation, or maintenance of any customer-provided systems. Exchange and message toll telephone services are not represented as adapted to the use of customer-provided systems where such systems are connected to the Telephone Company facilities. The responsibility of the Telephone Company shall be limited to the furnishing of facilities suitable for exchange and message toll services and to the maintenance and operation of such facilities in a manner proper for such services; subject to this responsibility the Telephone Company shall not be responsible for the through transmission of signals generated by the customer-provided systems or for the quality of, or defects in, such transmission or the reception of signals by customer-provided systems.

(C)

The Telephone Company shall not be responsible to the Customer or otherwise if changes in the criteria, or in any of the facilities, operations or procedures of the Telephone Company render any customer-provided facilities obsolete or require modification or alteration of such facilities or otherwise affect its use or performance. Where it is reasonably foreseeable to the Telephone Company that such changes may affect customer-provided facilities, the Telephone Company shall provide reasonable notice. The Customer also agrees to release, indemnify and hold harmless the Telephone Company for any infringement or invasion of the right of privacy of any person or persons, caused or claimed to have been caused, directly or indirectly, by the installation, operation, failure to operate, maintenance, removal, presence, condition, occasion to use E911 service features and the equipment associated therewith, or by any services furnished by the Telephone Company in connection therewith, including but not limited to, the identification of the telephone number, address or name associated with the telephone used by persons accessing 911 service thereunder, and which arises out of the negligence or other wrongful act of the Customer, its user, agencies or municipalities, or the employees or agents of any one of them.

To ensure 911 calls and emergency personnel are properly routed Telephone Company equipment must not be moved by the customer. Additionally, the Telephone Company recognizes one address for all lines on the same account and will not be responsible for multiple address location information. Therefore, the customer is responsible for directing emergency personnel to the specific location of the person in need and to any other physical location if all telephones are not located at the address on the account.

3.1.3 Liability (Cont'd)

Customer will indemnify, defend, and hold the Telephone Company harmless from any claims or causes of action arising from the non-implementation of Private Switch/Automatic Locations Identification (PS/ALI), the enabling of station level 911 service, and/or the failure of PS/ALI or station level 911 service if enabled.

(N)
|
(N)

The Customer also agrees to release, indemnify and hold harmless the Telephone Company in using a Multimedia Terminal Adaptor (MTA) or a telephone modem that requires electrical power in the event of failure. The Telephone Company may provide battery backup for the MTA or modem to customers with the intent of providing telephone service in the event of a power outage. However, continued telephone service in the event of a power outage is not guaranteed.

Under no circumstances shall the Telephone Company or its officers, directors, employees or agents have any liability to the county, a person placing an emergency call on the system or to any other person or entity, for any loss, damage, injury or liability which they may suffer, sustain, incur or become subject to, arising out of, based upon resulting from any negligence on the part of the Telephone Company or its officers, directors, employees or agents.

Notwithstanding any other provision of any service agreement or this tariff, the telephone company's entire liability to customer, and customer's sole and exclusive remedy for any damages caused by any service defect or failure, or for other claims arising in connection with any service provided by the telephone company, shall be customer's proven direct damages not to exceed per claim (or in the aggregate during any 12-month period) an amount equal to the total net payments payable by customer for the applicable service during the three (3) months preceding the month in which the damage occurred. Under no circumstances shall the telephone company be liable to the customer for any indirect, consequential, exemplary, special, incidental or punitive damages (including, without limitation, any damages for lost business, revenue, profits or goodwill) arising in connection with any service agreement or the provision or failure of any services (including, without limitation any service implementation delays or failures). This limitation of liability shall survive failure of any exclusive remedy, and shall apply regardless of the form of action, whether in contract, tort, warranty, strict liability, misrepresentation, negligence (including without limitation, active and passive negligence) or other theory of recovery. Nothing in this section limits customer's responsibility for the payment of charges due or the telephone company's obligation to provide credits due as provided in this tariff.

3.1.4 Directory Errors and Omissions

The Telephone Company's liability for damages due to errors or omissions in directory listings will be limited to a credit of one month's basic service. (C)

Connection of the Telephone Company's lines to the lines of another telephone company shall be the sole discretion of the Telephone Company.

3.1.7 Defacement of Premises

The Telephone Company shall exercise due care in connection with all work done on customer's premises. No liability shall attach to the Telephone Company by reason of any defacement or damage to the customer's premises resulting from the existence of the Telephone Company's facilities and associated wiring on such premises, or by the installation or removal thereof, unless such defacement or damage is the direct result of the sole negligence of the Telephone Company. - C. The facilities are of a type other than that which the Telephone Company would normally utilize in the furnishing of its services.

3. Rules and Regulations (Cont'd)

(N)

Construction charges will include materials, contract services, and loaded labor. The Customer is required to bear unusual maintenance costs for special construction.

Overhead loading of labor is calculated with a composite allocation factor that is based on plant, construction, and engineering personnel salaries and expenses; supervision, pension expense, insurance, unemployment and social security taxes. This factor is developed annually by determining the relationship of the above expenses to the total payroll base. It is applied to expenses for construction, removals, plant and central office maintenance.

The Telephone Company will provide an estimate of actual charge to the Customer prior to the start of construction.

When attachments are made to poles or other companies, in lieu of providing construction for which the Customer would be charged under the provisions hereof, the cost to the Telephone Company for such attachments are borne by the Customer.

The Customer is required to pay construction charges as made by another company providing facilities connecting with the facilities of the Telephone Company.

Construction charges will not apply to the Customer's station installation that includes the aerial drop that extends from the last pole to the demarcation point. Refer to Glossary of Definitions and Terms for explanation and examples of the term "Demarcation Point."

Installation of facilities within subdivisions shall be underground where underground treatment is the usual form of installation.

Where cable is laid in conduit, the underground conduit shall be constructed and maintained by or at the expense of the Customer and in addition, the Customer shall pay the cost of the underground cable, including the cost of installing, less the estimated cost to the Telephone Company of installing such aerial facilities as would be (or are) required to furnish the same service. If Customer requires location-specific Automatic Location Information (such as floor and room number within a building) delivery to the Public Safety Answering Point, or otherwise desires E-911 service to be provided for multiple user configurations, Customer must implement Private Switch/Automatic Locations Identification (PS/ALI). Customer must obtain the software and support that enable PS/ALI from a third-party provider.

3.2.14 Enhanced Directory Assistance

The Telephone Company shall list its customers with the directory assistance operators to provide the requested telephone numbers of all customers, except telephone numbers unlisted at the customer's request.

In the event of an error in the listed numbers of any customer, the Telephone Company shall intercept all calls to the listed number for a reasonable period of time provided existing telephone equipment will permit and the number is not in service. In such event of an error or omission in the name listing of a customer number such customer's correct name and telephone number shall be filed with directory assistance operators. The correct number shall be furnished to the calling party either upon request or interception.

Whenever any customer's telephone number is changed after a directory is published, the utility shall intercept all calls to the former number for a reasonable period of time and give the calling party the new number provided existing telephone equipment will permit and the customer so desires.

3.2.15 711 Access for Telecommunications Relay Service

(M)

Telecommunications Relay Service (TRS) enables deaf, hard-of-hearing or speech-impaired persons who use a Text Telephone (TT) or similar devices to communicate with the hearing population not using TT. It also allows the hearing population not using a TT to communicate with deaf, hard-of-hearing or speech-impaired persons who do use a TT. A Customer will be able to access the state provider to complete such calls by either dialing the applicable telephone number directly or by dialing the number 711.

The Telephone Company will bill the customer a monthly charge on all residential local exchange lines as necessary to fund the establishment and operation of a dual party relay system and a distribution system of TTY's and other related telecommunications devices in South Carolina.

5.9. Local Interconnection Service

5.9.3 Description of Service

- A. LIS provides a connection between a Customer's broadband facilities and the public switched telephone network, and related Services described herein. In order to make use of the Company's LIS, Customer's broadband facilities must consist of an IP-based, broadband connecting Facility between the Customer and the Premises of each Subscriber that has the ability to use a Cable Modem Termination System (CMTS) employing the Network-based Call Signaling specified by Cable Television Laboratories, Inc.(CableLabs®), a soft switch, a media gateway, and appropriate Customer Premises Equipment. LIS does not support Customers providing services to Subscribers that operate using a different format than provided by the Company.
- B. The IP-based, broadband connecting Facility between Customer and Subscribers, the CMTS, the soft switch, the connecting Facilities to the Company's media gateway, and all Customer Premises Equipment must be provided by the Customer or its Subscribers and is not included as part of LIS. The Company will only accept and deliver traffic in time division multiplex ("TDM") protocol. The Customer shall, at its sole cost, be responsible for providing all equipment, software, facilities and IP connectivity necessary for the Customer to provide interconnected VoIP service to its Subscribers.
- C. LIS is available to Customers where suitable Facilities exist, are technologically available, and are operationally and economically feasible.
- D. LIS provides standard 10-digit telephone numbers with associated two-way local exchange telecommunications service to permit Customers to provide local interconnected VoIP service to Customer's Subscribers. Where available in a service territory, LIS may also include support for the provision of 911 capability, Telecommunications Relay Services (711), and Directory Listings. Toll services, Operator Services and Directory Assistance are not included in LIS. LIS does not support calling to 976 or similar exchanges or to calls to the 900 Service access code.

5.9.4 Use of Service

- A. LIS is provided subject to, and in accordance with, the regulations and rates in this Tariff, applicable law, and the Company's agreements with other providers, including but not limited to: applicable state or federal law, applicable state or federal regulations, orders issued by regulatory agencies and/or courts of competent jurisdiction, Incumbent Local Exchange Company ("ILEC") interconnection agreements, or similar requirements (collectively "Company Obligations"). To the extent that changes in Company Obligations affect the terms and conditions under which the Company may provide LIS, including being unable to provide LIS at all, the liability of the Company for any such changes shall be subject to the limitation of liability provisions set forth in Section 3 of this Tariff.
 - 1. Customer shall, at its sole cost, be responsible for providing all equipment, software, Facilities and IP connectivity (including connectivity to Subscribers) necessary for the Customer to provide interconnected VoIP service to its Subscribers.

- a. The Customer must provide the proper signaling information (e.g., originating Calling Party Number (CPN) (a/k/a Automatic Number Identification (ANI)), destination called party number, Originating Line Information Parameter ("OLIP") on calls to 8XX telephone numbers, calling party category, charge number, Automatic Location Identification (ALI), etc.) for all calls. To the extent that failure to provide ANI or other signaling information leads to increased charges from third parties to the Company as a result of the Company Obligations, the Company may recover all such increased charges, as well as the Company's reasonable Costs associated with defending against and/or administering such increased charges, from the Customer. If for two months in any twelve month period the Customer sends calls to the Company lacking required signaling information in excess of 5% of all calls during such months, the Company may terminate LIS to the Customer immediately with no liability from the Company to the Customer for such termination.
- b. The Customer shall input, validate and maintain accurate Subscriber information so that the Company can provide such Customer-provided information to applicable national databases, including but not limited to, Automatic Local Identification (ALI) Database, Directory Listing information, Line Information Database (LIDB) and Caller ID with NAME Database (CNAM).
